POWER SERVICES

- New Build
- Upgrades
- Maintenance
- Storm Restoration
- Pole Replacements
- Substation
 - New Construction, Maintenance, Rebuild
- Splicing
- Testing
- Fault Location
- Overhead Line Construction
- Re-Conducting Operations
- "Hot Work"
- Line Retirement
- Storm Repair
- Underground Construction
- High Voltage Terminations
- Man Holes and Duct Banks
- Metering
- Secondary Drops and Services
- Street Lighting
- Fiber Optic Cable Installation
- Fiber Optic Terminations and Fusion Splicing
- Infrared Thermography

POWER

We are a single source for the construction and maintenance of repair and emergency response services that address the broad range of needs of our commercial, industrial and government customers.

MP Technologies offers a unique blend of capabilities that allow us to be a single resource for the distribution and maintenance of electric power, data & voice communications and broadband cable infrastructures.

Our experienced team has the qualifications, certifications and technical training to fit your specific job.

GAS & PIPELINE

Our Gas Division manages projects from installing services, to mainline, to building complete gas systems. MP Technologies' gas crews are composed of experienced foremen, fusers, pipefitters, welders, operators and laborers.

MP Technologies emphasizes safety in all we do. Our employees are trained in safe work practices for all aspects of installing gas. Our equipment is well maintained and designed for the tasks at hand. We have an entire fleet of Horizontal Directional Drills, a complete line of

equipment that can handle small precise jobs all the way to large projects requiring size and power. MPT has large hydro-vac rigs as well as smaller vac setups to handle any need for exposing utilities.

We take pride in our work and our relationships with our customers. MPT can be counted on to do the job right.

GAS

• New & Rehab Construction

- Open Trench
- Directional Drilling
- Hydro Excavating
- Plowing
- Steel & Plastic Mainline
- Service Lines
- Regulation Stations
- Joint Trench
- Meter Installation & Replacement
- Hot Tap
- Tie Ins
- Cathodic Protection
- Coatings
- Station Work
- Steel Welding
- Plastic Fusion
- Restoration Hard & Soft Surface
- Barricading
- Sewer Lateral Inspection
- Sewer Mitigation Camera & Locating of Lines
- Erosion Control

PIPELINE

• New Construction

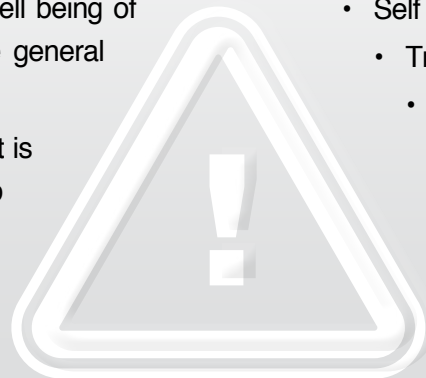

- Mainline
- Station Construction
- Pipe Fabrication
- Welding
- Valve Replacement

MP'S SAFETY PROGRAM

AT MP TECHNOLOGIES, WE UNDERSTAND THAT SAFETY COMES FIRST.

That's why we adhere to a comprehensive set of safety practices throughout the life of a project. We're committed to protecting the health and well being of our employees, your employees and the general public visiting a job site.

MP Technologies provides equipment that is well maintained and appropriate for the job task. We provide necessary personal protective equipment and the training to perform the job safely.

We maintain a safety and health program that conforms to the best practices of organizations in our industry. Our safety program includes the following:

- Job Hazard Analysis Program
- Self Inspection Program
- Training Guidelines
- Personal Protective Equipment with Instruction for Care and Use
- Developed & Enforced Work Safety Rules
- Prompt Reporting & Investigation of Accidents

MP TECHNOLOGIES contracts through MEA for Operator Qualification (OQ) training and testing. The program is 100% online. All MPT employees are assigned courses based on their position and the tasks they will perform. Any individual working on any gas system is required to successfully pass and complete all of those assigned courses. This includes HDD operators and locators as well as Hydro-Vac operators. In addition, employees are field evaluated on the tasks they are qualified for and quality audits are performed on a regular basis on all gas projects.

Training that we offer to our employees:

- Facility Owner Train the Trainer
- Electrical Safety
- MN Dot Signal & Lighting Certification
- Critical Area Excavator Training-City of St. Cloud
- Stormwater & Erosion Control Certification
- Fuser Certification to Multiple Contracted Utility Standards
- Vac Truck Training
- Aerial Lift Training
- Horizontal Directional Drill Training
- Electrical Operator Qualifications
- Gas Operator Qualifications
- Trench & Excavation Safety

- OSHA 10 & 30
- Load Securement
- Confined Space & Gas Monitoring
- Defensive Driving
- Safety and CPR

OPERATOR QUALIFICATION & GAS TRAINING PROGRAM

ELECTRIC

MP Technologies Electrical Group provides professional design and construction services. Including scope outline, well defined cost analysis, preliminary plans, specifications, coordination drawings, critical path scheduling and turn-key construction.

PRECONSTRUCTION

- Conceptual Estimating
- Life Cycle Analysis
- Energy Analysis
- Cost Analysis Evaluation
- Data Center Risk Analysis, Efficiency Assessment, Redundancy/ Back-Up Analysis
- Major Equipment Selection
- Utility Coordination
- Scheduling (Work Force, Material, Equipment by Others, etc.)
- "BIM" Opportunities (Building Informational Modeling)

CONSTRUCTION

- Design Build Projects (CAD capabilities, Engineered Drawings)
- Construction Diversification (New Const., Renovation, Preventive Maintenance & Maintenance)
- Turn-Key Construction
- Low, Medium and High Voltage Design, Installation, Testing & Commissioning
- Obtaining Required Permitting
- Fiber Optic/Controls/Programming
- Network Testing and Certifications
- PLC, Automation and Controls
- Underground and Aerial Installations

PROVIDE SERVICES FOR INDUSTRIES

- Commercial (High Rise & Low Rise)
- Mission Critical / Data Center Facilities/ Financial Institutions
- Health Care
- Gaming Facilities/Casino Hospitality/Hotel/ Convention Center/Auditorium/Arenas/ Stadiums/Sports Facilities/Theatres/ Churches
- Renewable Energy/Coal Processing/Gas/ Oil /Turbines/Power Plant
- Research/Life Science/Pharmaceutical/ Laboratory/Educational Facilities/ Government Facilities
- Shopping Malls / Department Stores
- Airports
